

## **Seeing Cam Overview**

---

The DXG Seeing Cam, available in three models, is a Wi-Fi video monitoring Smart Cam, with capabilities to stream high-definition video to iOS and Android smartphones and tablets. Designed for your home or business, Seeing Cam allows users to view their homes and businesses from anywhere in the world, receive alerts with motion or audio changes and view in real-time or recorded to the cloud or device SD card.

## **Seeing Cam Advantage**

---

- Fast and simple installation in 60 seconds
- Crisp Wi-Fi video both streamed and recorded
- Compatible with iOS or Android
- No cables or software required
- Two-way audio for listening or communicating through the device
- Smart motion detection sends real-time alerts/notifications based on user-defined settings
- Infra-red LED light for night vision captures 24/7 clear footage
- SD card slots for simple, localized video storage or easy cloud-storage options
- 256-bit AES encryption provides bank-level security for maximum privacy

## **Before you hit the road, it's fast and easy to secure your home or business:**

- Set email alerts to flag unexpected sound or motion activity in your home when away.
- Place Seeing Cam inside the home facing out, so potential intruders can be seen on camera before any issues occur.
- Use multiple cameras around the home and garage, all viewed from a single Seeing Cam app.
- Use the cloud recording to store and view video up to seven or 30-days so you can review your recordings at any time. Cloud recording includes seven-day continuous recording for \$8.99/month, and 30-day continuous cloud recording for \$29.99/month
